

SPOTTED PIGEONS AND DOVES IN CÓRDOBA

The pigeon area is located two hours northwest of the city of Córdoba.

The season is also opened 365 days a year and you can shoot 120 pigeons on any given day. These birds are large and fast, and work very well with decoys. Like our guests keep saying, "it's like hunting ducks without getting wet" (and without getting up so early either I may add).

Our guests find this experience to be a very good complement of the dove shoot, reason why we decided to put together this combined hunt that includes 3 days shooting doves and 2 days hunting pigeons in beautiful Estancia Siguiman.
